Ron Beehler presently serves as Interwest Consulting Group's, Building and Safety Division Manager, his responsibilities include direct oversight of plan review and inspection services for governmental agencies in addition to providing specialized structural engineering consulting services. Prior to joining Interwest Ron held the position of Chief Building Official with the City of Sacramento's Building Inspection Division directing a staff of one hundred twenty engineers, plan reviewers and building inspectors. Prior to working for the City of Sacramento Ron held the position of Regional Compliance Officer with the Office of Statewide Health Planning and Development (OSHPD) where he was responsible for hospital and health care facility construction oversight in the Los Angeles and San Diego areas. Prior to joining OSHPD Ron was Chief of Engineering Design and Construction for the California National Guard. In addition to his regular employment Ron held the part time position of Construction Coordinator for seven years with Sacramento Habitat for Humanity where he coordinated the construction of 23 homes for low income families utilizing volunteer labor.

Ron is licensed as a Structural Engineer and Civil Engineer in California and Nevada, licensed as a General and Electrical Contractor in California. He is certified by the International Code Council, (ICC), as a Plans Examiner, and Building Inspector. Over the past twenty five years Ron has designed, plan reviewed, and constructed numerous buildings and has extensive experience in the building design, construction and inspection business.

Bill Rodgers, PE, SE
Senior Structural Engineer
8150 Sierra College Boulevard
Suite 100
Roseville, CA 95661
916-781-6600 Office

As a Senior Structural Plan Review Engineer with Interwest Consulting Group, Bill provides structural plan review services to a host of governmental agencies throughout California and Nevada. With over 20 years experience as a Structural Engineer, including over eight years as a plan review engineer, Bill has designed or plan reviewed a multitude of building structures including office buildings, retail stores, factories, high-rise buildings, curtain wall framing systems, bridges, and California schools. Bill has also provided forensic structural evaluations of existing building structures. Bill utilizes his vast experience and knowledge to promote the success and safety of client's projects by providing a reasonable level of structural plan review, effective communication, and exceptional interpersonal skills. Bill has worked with some of the leading structural engineering and municipal consulting firms in California which has allowed him to master code requirements and design requirements for steel, concrete, masonry and wood framed structures.

Bill is licensed as a Structural Engineer and Civil Engineer in California and Nevada. Over the past 20 years Bill has effectively worked with structural designers on projects utilizing a vast array of structural systems to identify and successfully resolve structural building code related issues.
